

PROJECT WOOL2LOOP:

Mineral wool waste back to loop with advanced sorting, pre-treatment, and alkali activation - WOOL2LOOP

- **Funding Instrument: Horizon 2020, Innovation Actions**
- **Client: Saint-Gobain Finland Oy**
- **EU contribution for the project: 5,3 million EUR**
- **Consortium size: 14 partners**
- **Project information:**
<https://www.wool2loop.eu/en/>
- **Culmentor supported the consortium in writing the grant-winning project application: Creating texts to different application sections, reviewing application and providing comments, advising partners and collecting material (including budgets) from them. Culmentor continued with the project as an administrative consultant, providing support to the project implementation phase.**
